ABOUT ME

Lana Datsenko

My focus is on creating practical AI solutions using no-code and low-code tools such as Make, OpenAI, Airtable, Telegram bots, and CRM automation.

I specialize in connecting AI models with real business workflows — from chatbots and booking automation to content pipelines and data processing systems.

I design and build AI-powered automation systems that help businesses reduce manual work, streamline operations, and scale customer interactions.

AI Content Automation Pipeline

Problem

Content creation for multiple platforms requires repetitive manual work:

Transcribing video

Writing specific posts

Generating visuals

Organizing publishing

Solution

An AI-powered automation system that converts video content into structured social media posts automatically.

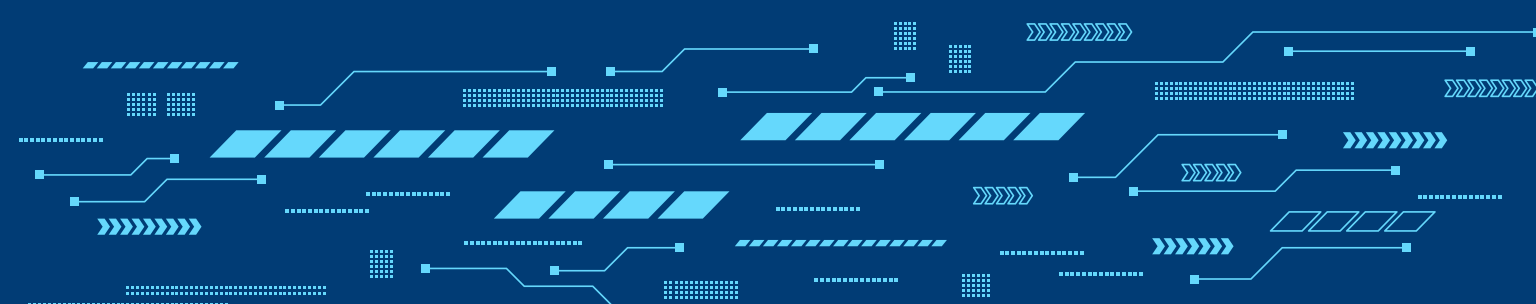

Video transcription via API

AI analysis and summarization

Platform-specific post generation

Thumbnail & image AI generation and moderation

Automated publishing preparation

AI Meeting Intelligence & Follow-Up Automation

AI Meeting Intelligence → CRM & Follow-up Email Automation

CLIENT:
Real Estate Agent /
Mortgage Broker

USE CASE:

Client meetings, follow-up communication, and lead qualification automation.

Industry:
Real Estate

Problem

Real estate agents handle many client meetings and follow-ups.

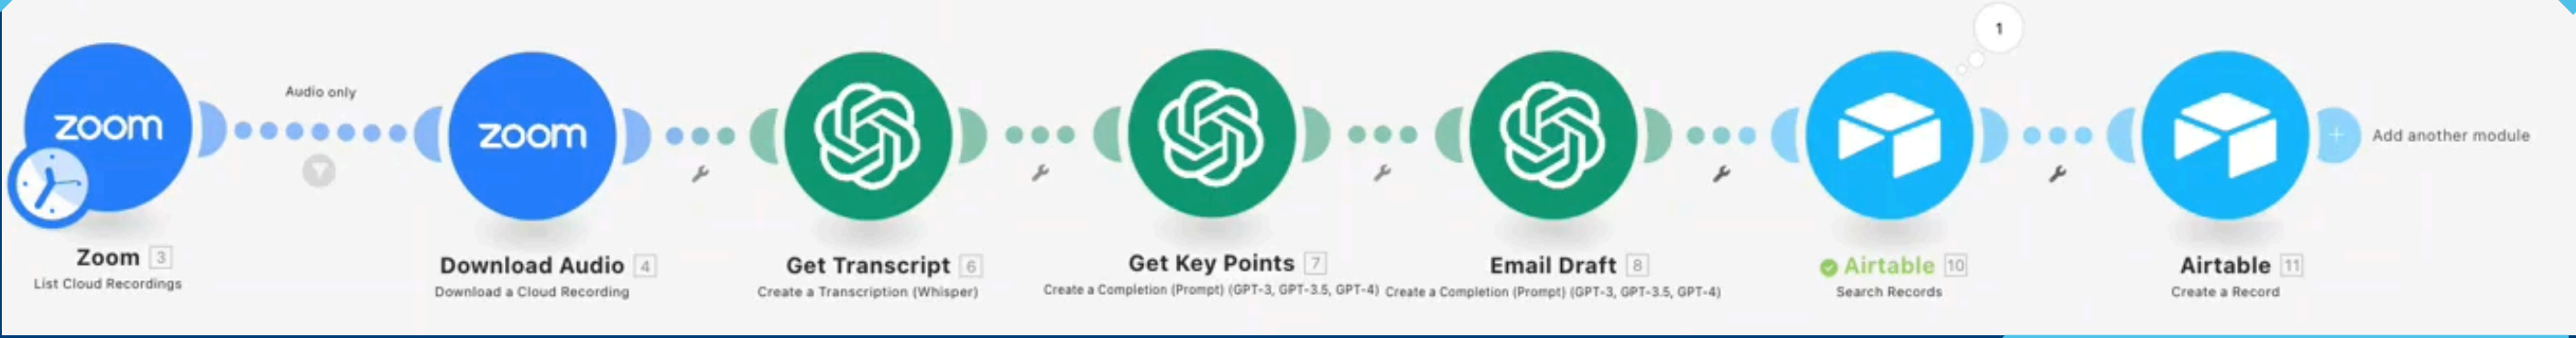

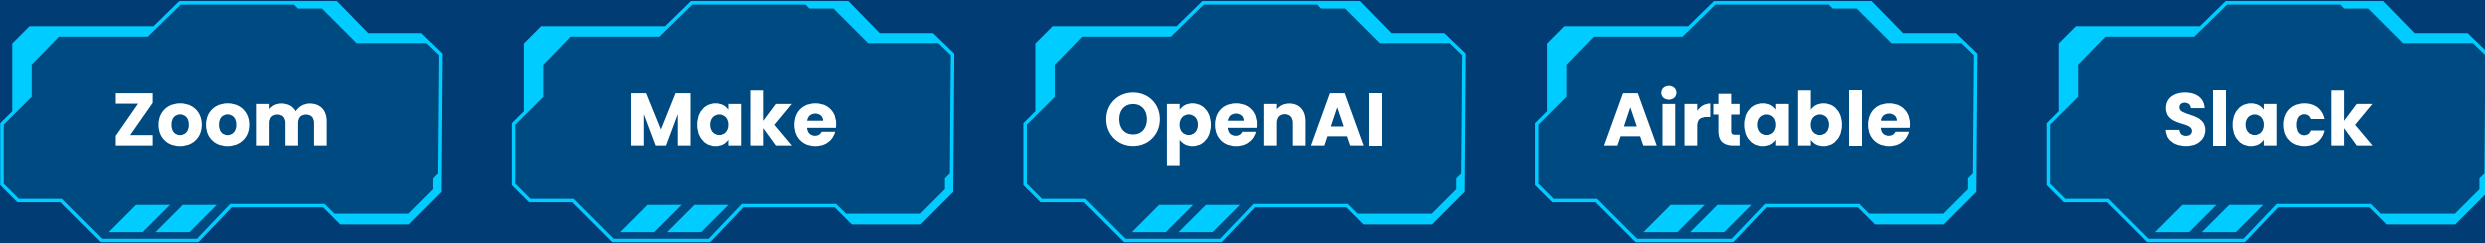

Key information from conversations is often lost, while agents must manually:

- review meeting recordings
- write follow-up emails
- update CRM records
- qualify leads

This slows down client communication and reduces productivity.

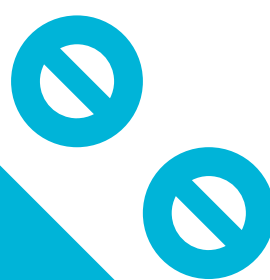

Solution:

AI system that processes meeting recordings, extracts key insights, and generates follow-up emails automatically.

The system analyzes meeting conversations, identifies key discussion points and action items, and assists agents with client communication.

Email is ready to sent

Please check the email

Good afternoon, Alex.

Thanks for the conversation today. To summarize: you are looking for a family home in the North Sydney area, with three or four bedrooms, definitely with a garden, budget up to \$1.5 million. It is also important that there is a good school nearby, since you have two children.

Next steps:
I will prepare a selection of affordable home options that meet your requirements. In addition, I will collect information about local schools and infrastructure. By the end of the day, I will email you all the details with photos, descriptions and prices. After that, we can agree on a convenient time for viewings on Saturday and Sunday of the upcoming weekend.

If you have any additional questions or requests, please contact me at any time.

Sincerely, Simon Phone: +61 4XX XXX XXX Email: simon@example.com

CASE 3

AI-Powered Automation System for Online Education Programs

CLIENT:

**Online education program
(skills marathon)**

Automation of student
management and
homework review.

Use case

System capabilities:

- *student registration via Telegram*
- *homework submission through the bot*
- *AI analysis of assignments*
- *automated student feedback*
- *progress tracking in CRM*

Problem

Managing online learning marathons involves multiple manual processes.

Organizers must register students, distribute assignments, review homework, provide feedback, and track progress.

As participation grows, these tasks become difficult to scale and maintain consistently.

heavy daily workload

Congratulations on the start of your transformation! 🚀
Are you ready to make a breakthrough? This is an important step towards big changes in your life and career!

Today I decided to take a small but meaningful step toward my personal growth.
I wrote down three things I want to improve in my life and chose one action I can start today.

My step was simple: I spent 20 minutes learning something new and reflecting on how it can help me move forward.
This small action reminded me that progress does not require huge changes — consistent small steps create real transformation over time.

User
Lana

<https://aiable.com/ajpguNKYnQVZSCmBY49RCyD6zZETvhd1CgChyutPmz2tecaAMGFzoiM4y>

Here is the task:
Task 2 - Action
Even small drops form an ocean of confidence.
Take one simple step toward your personal growth today and record the result.
Today I decided to take a small but meaningful step toward my personal growth.
I wrote down three things I want to improve in my life and chose one action I can start today.
My step was simple: I spent 20 minutes learning something new and reflecting on how it can help me move forward.
This small action reminded me that progress does not require huge changes — consistent small steps create real transformation over time.

Here is the student's answer:
Great work taking that first step! You've already set a strong foundation by:
1. Clarifying three areas for growth
2. Picking one concrete action to start today
3. Spending focused time (20 minutes) learning and reflecting
Here's what stands out:
• You proved that big change begins with small, consistent efforts.
• You built momentum—today's short session is tomorrow's habit.
• Reflection helped you connect new learning to your personal goals.
A few ideas to deepen the impact:
1. Name your three improvement areas. Writing them down makes them more real—and lets you track progress.
2. Capture one specific insight from today's 20-minute session. What surprised you? What skill or idea will you apply first?
3. Plan your next micro-step: even five minutes tomorrow can keep the momentum going.
Keep celebrating these small wins! Over time, this practice will turn into lasting transformation.

Curator can:

- review AI feedback
- edit or rewrite the response
- approve the message
- update student status

Human-in-the-Loop AI

Results

The automation system reduces manual work for course organizers and improves student communication.

- automated student onboarding
- structured homework tracking
- AI-assisted homework evaluation
- faster feedback to students
- centralized learning CRM

About FitLife Studio

Hi there! I'm the online assistant for FitLife Studio 🙌
How can I call you?

FitLife Studio is a modern fitness studio located in the center of Lviv (Halytska 1). We offer group and personal trainings, special programs for weight loss, muscle gain, rehabilitation, and more! Our studio has spacious halls, new equipment, certified trainers, showers, lockers, and even a fitness bar.
I can help you with our schedule, prices, or signing up for a free trial class. What interests you the most? 😊

can i get free trial?

Absolutely! You can get one free group trial class at FitLife Studio if you're a new client 🙌
May I know your name so I can guide you with the next steps? 😊 Would you like to try yoga, HIIT, pilates, or maybe something else?

my name is Lina. I m interested in pilates

Great choice, Lina! Pilates is perfect for strengthening your core and improving flexibility 🙌
To book your free pilates trial, please fill out this quick form where you can pick the best day and time for you: 🙌 <https://forms.gle/aBkm1Vyv6wzwrdeu9>
Once you submit the form, our administrator will contact you to confirm your spot. If you have any questions or want to know more about our pilates classes, just let me know! Would you like more details about pilates at FitLife Studio? 😊

POWERED BY
Calendly

Problem

Solution

- no instant booking notifications
- manual meeting management
- difficult rescheduling process
- fragmented communication channels

Common issues

Scheduling Automation Architecture

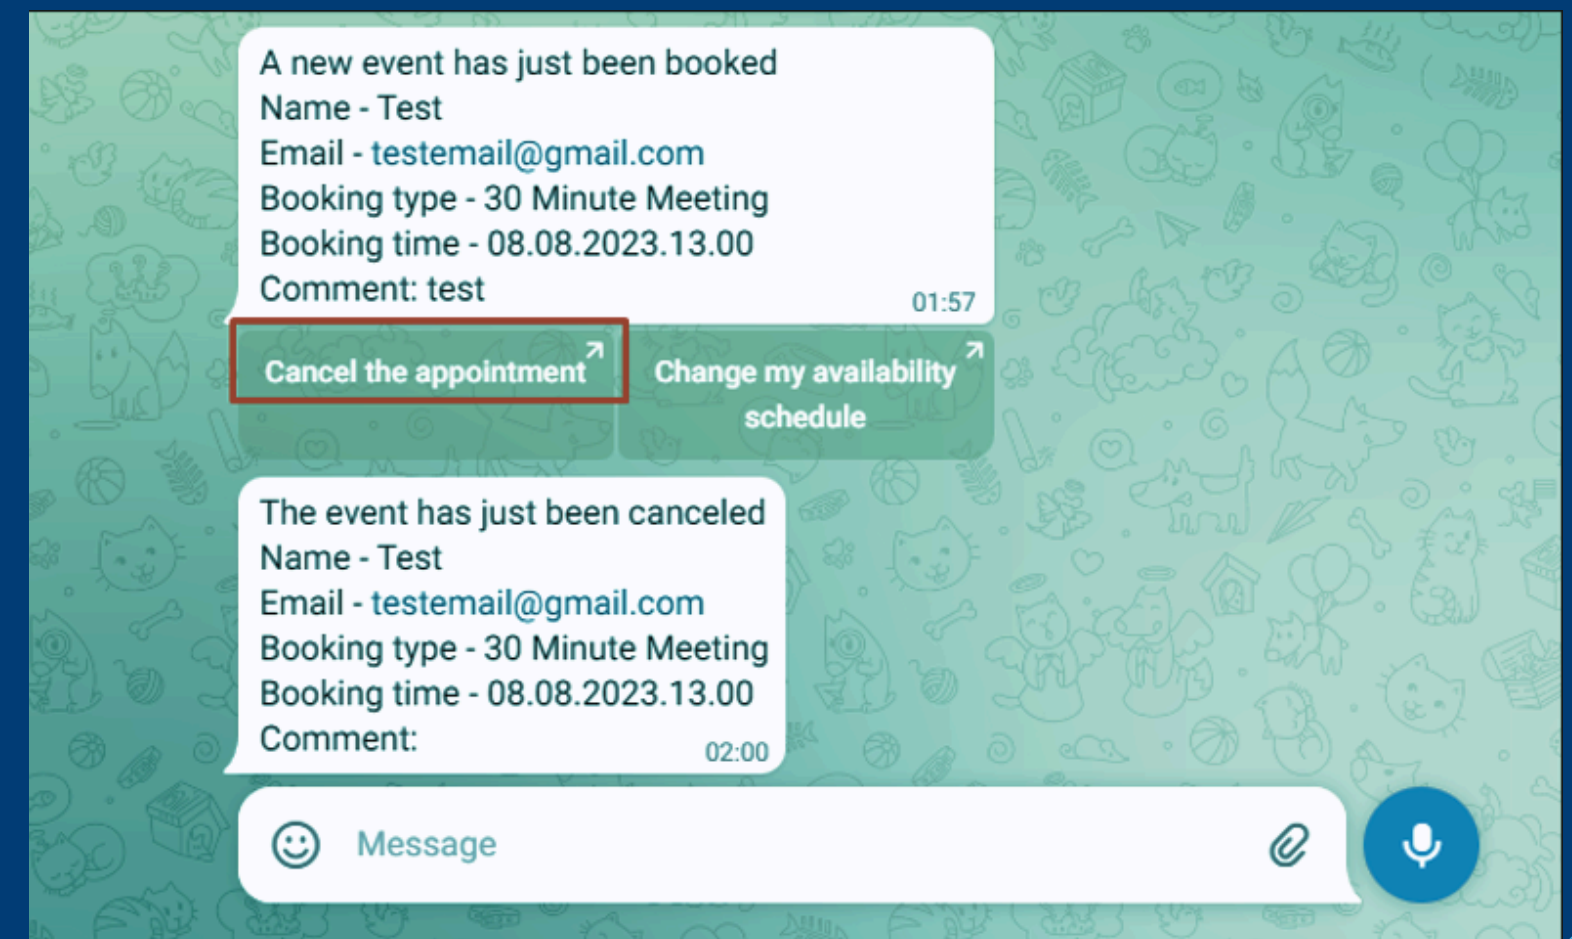

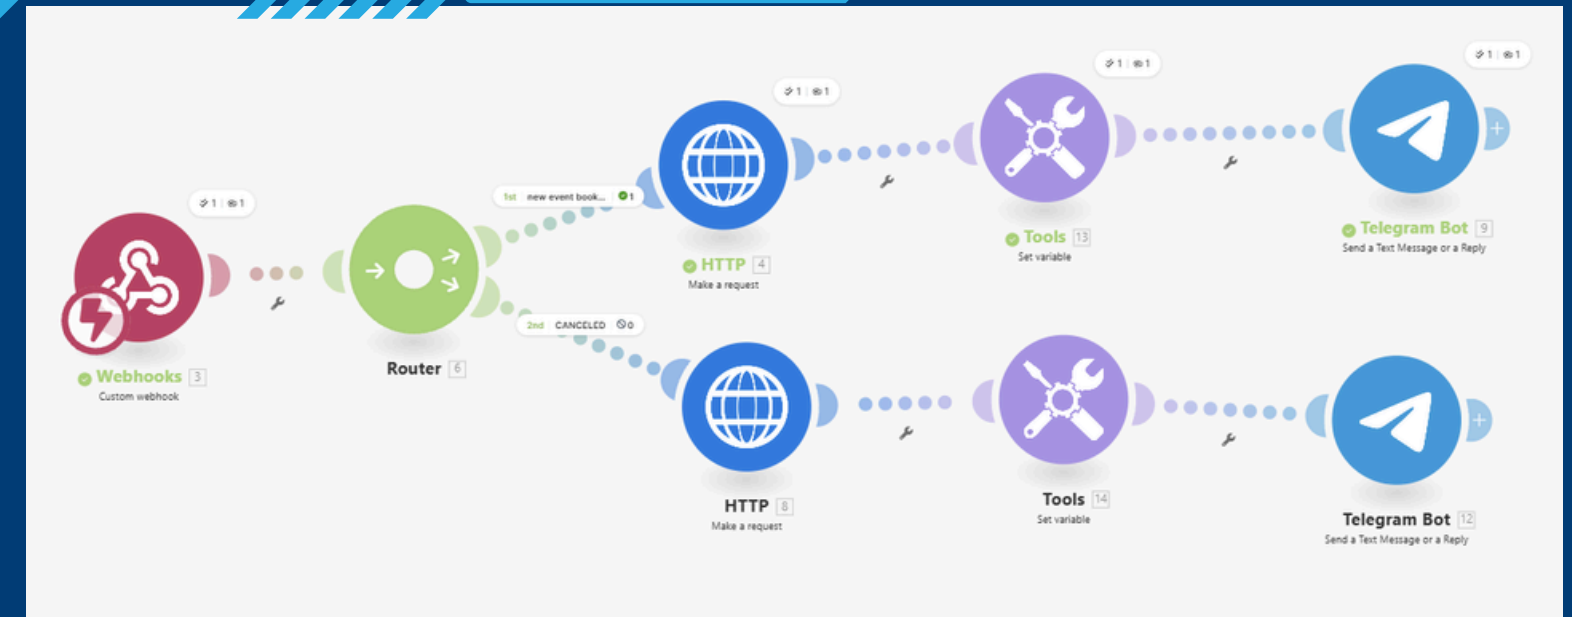

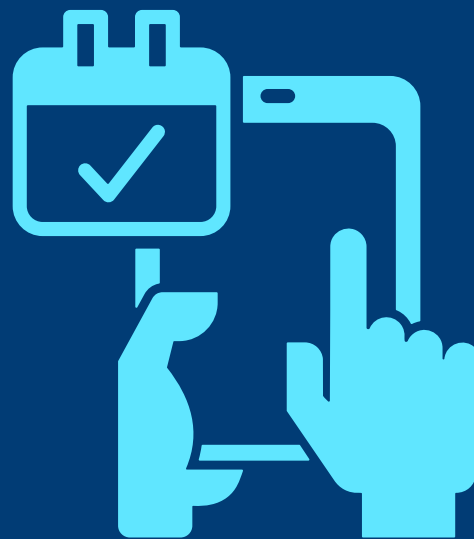

Automation Logic

The automation processes booking events and routes them depending on the action.

- new meeting booked
- meeting cancelled
- meeting rescheduled

Each event triggers a specific Telegram notification.

Events handled

Result

The automation connects Calendly with messenger and delivers real-time booking updates with interactive management options.

- *instant booking notifications in Telegram*
- *structured meeting details (name, email, time, event type)*
- *quick meeting management with Reschedule / Cancel buttons*
- *faster communication and reduced manual coordination*

Additional Automation Projects

AI Finance Assistant Bot

– AI assistant for financial guidance that processes voice, image, and text inputs, extracts key information, and structures data automatically into spreadsheets or databases.

AI Plant Scanner Bot

image recognition bot that identifies plants and provides care recommendations

18:19 ✓

Processing your plant image... This may take a few seconds.

Обрабатываю изображение растения... Это займёт несколько секунд.

18:19

Certainly! Let's analyze the plant in the photo.

PLANT IDENTIFICATION

The plant appears to be a *Syngonium podophyllum*, commonly known as Arrowhead Plant or Nephthytis. It belongs to the family Araceae and the genus *Syngonium*.

NATURAL HABITAT

Syngonium podophyllum is native to tropical rainforests in Central and South America. It thrives in warm, humid conditions and typically under the canopy where it receives filtered light.

CARE GUIDE

Lighting: Prefers bright, indirect light but can tolerate low-light conditions.

Watering: Keep the soil consistently moist but not waterlogged. Allow the top inch to dry between waterings.

plant to temperatures below 60°F (15°C).

Here are a few specific recommendations for home care:

1. Wipe the leaves regularly with a damp cloth to remove dust and allow the plant to photosynthesize efficiently.
2. Rotate the plant occasionally to ensure even growth on all sides.
3. Fertilize during the growing season (spring and summer) with a balanced liquid fertilizer diluted to half strength.
4. Be mindful that all parts of the Dieffenbachia plant are toxic if ingested, so keep it away from children and pets. ⚠️

PLANT CONDITION ASSESSMENT

The plant shows signs of stress. Several leaves are significantly yellowing, with brown, crispy edges and spots. Some leaves are drooping. The color variation suggests an uneven response to care.

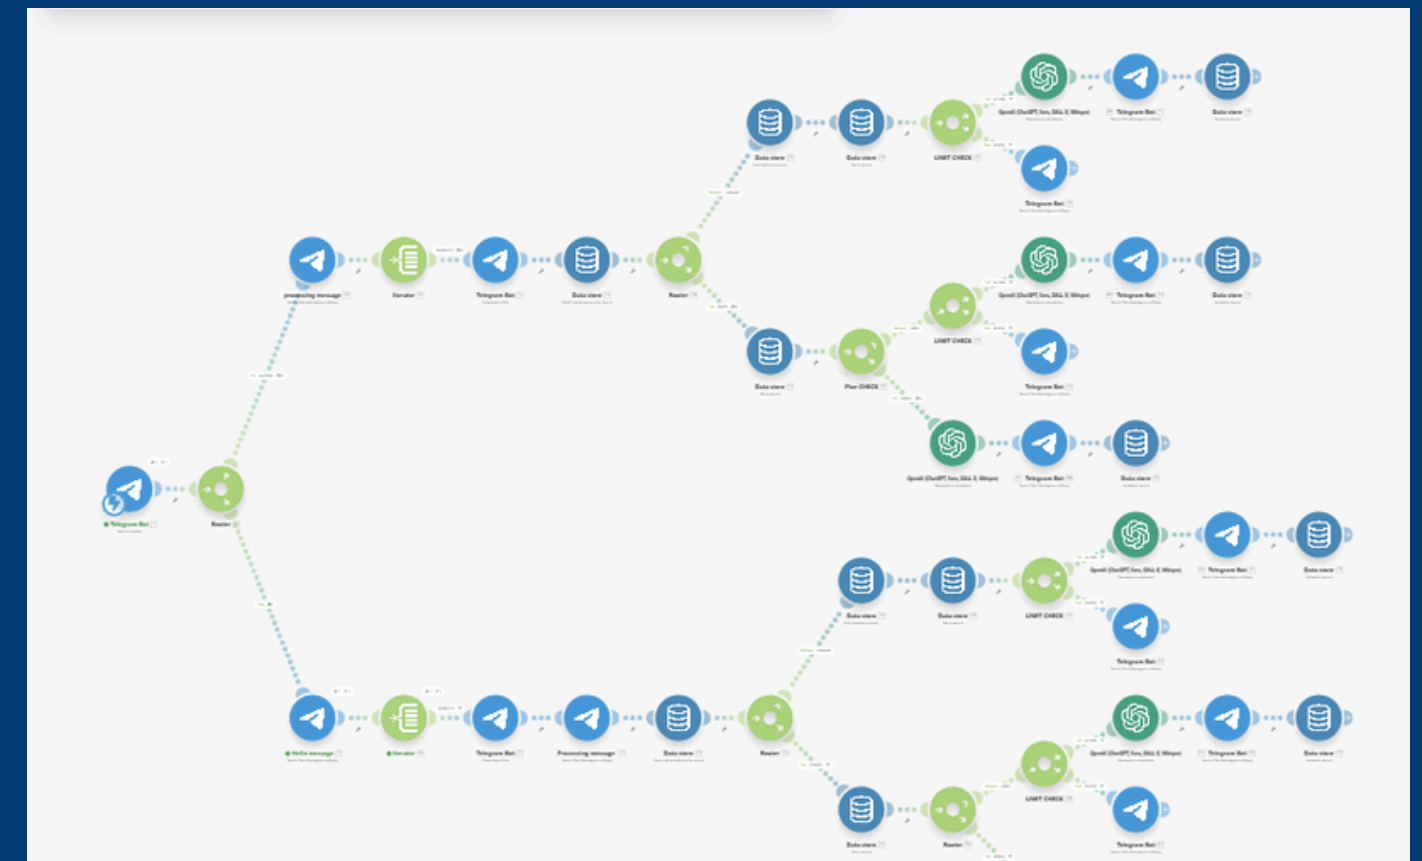

The most likely causes are a combination of factors:

- Overwatering: The yellowing and browning of the leaves, especially with the spots, can indicate root rot caused by consistently soggy soil.
- Low light: While Dieffenbachias tolerate lower light, insufficient light can contribute to yellowing leaves.
- Potential nutrient deficiency: The uneven coloration could also suggest a lack of essential nutrients.

Recommendations:

1. Check the soil moisture. If it's consistently wet, repot the plant into fresh, well-draining soil. Remove any mushy, dark roots during repotting.
2. Move the plant to a location with brighter, indirect light.
3. Reduce watering frequency and ensure proper drainage.
4. Consider a diluted fertilizer application during the growing season, but only after addressing the watering and light issues.

IMPORTANT DISCLAIMER

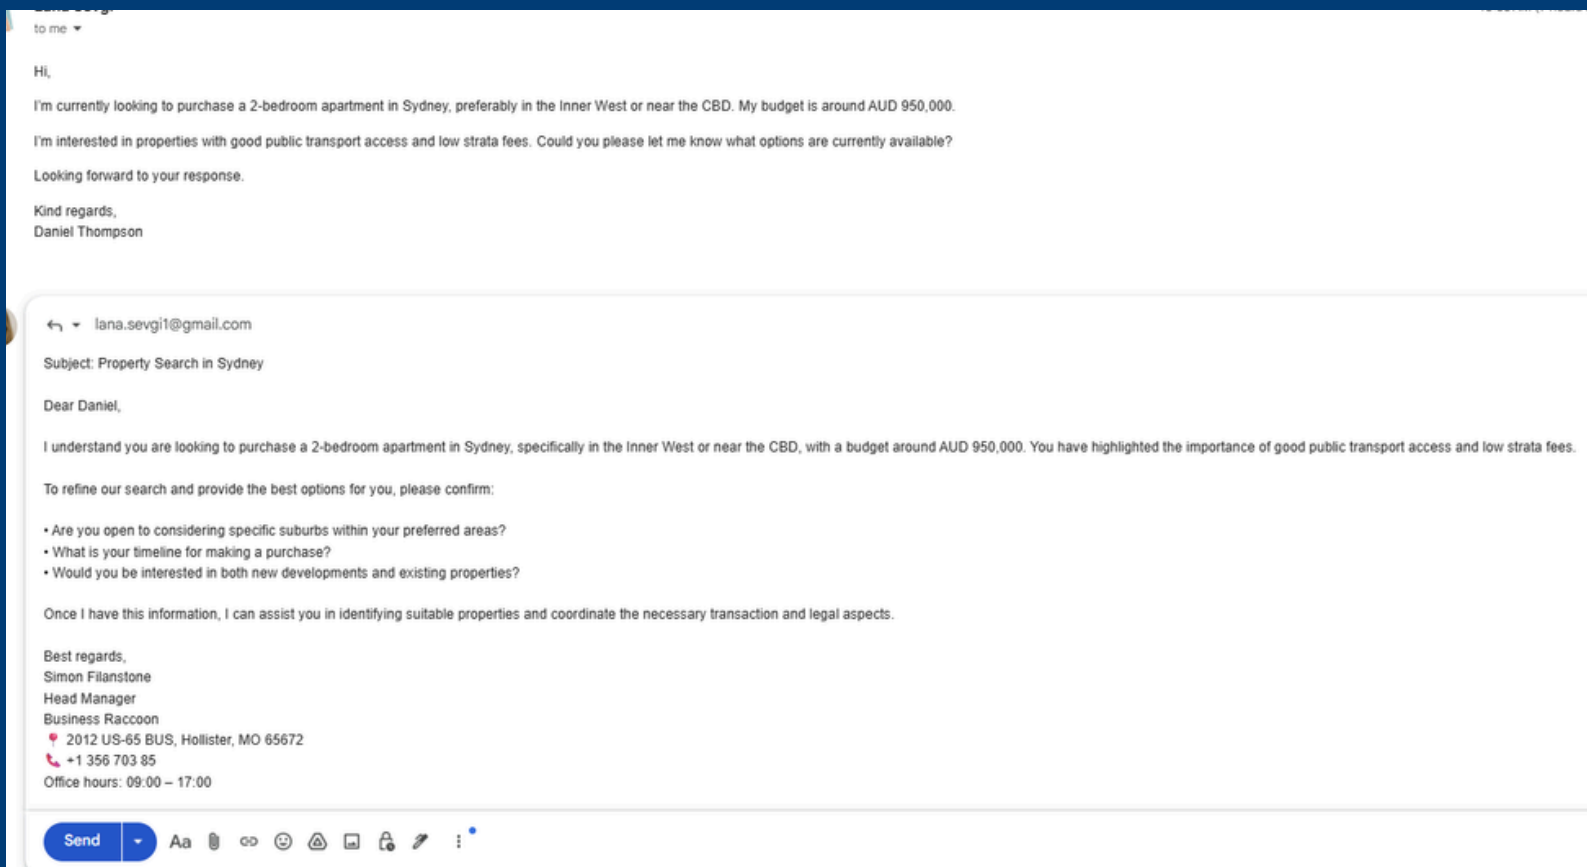

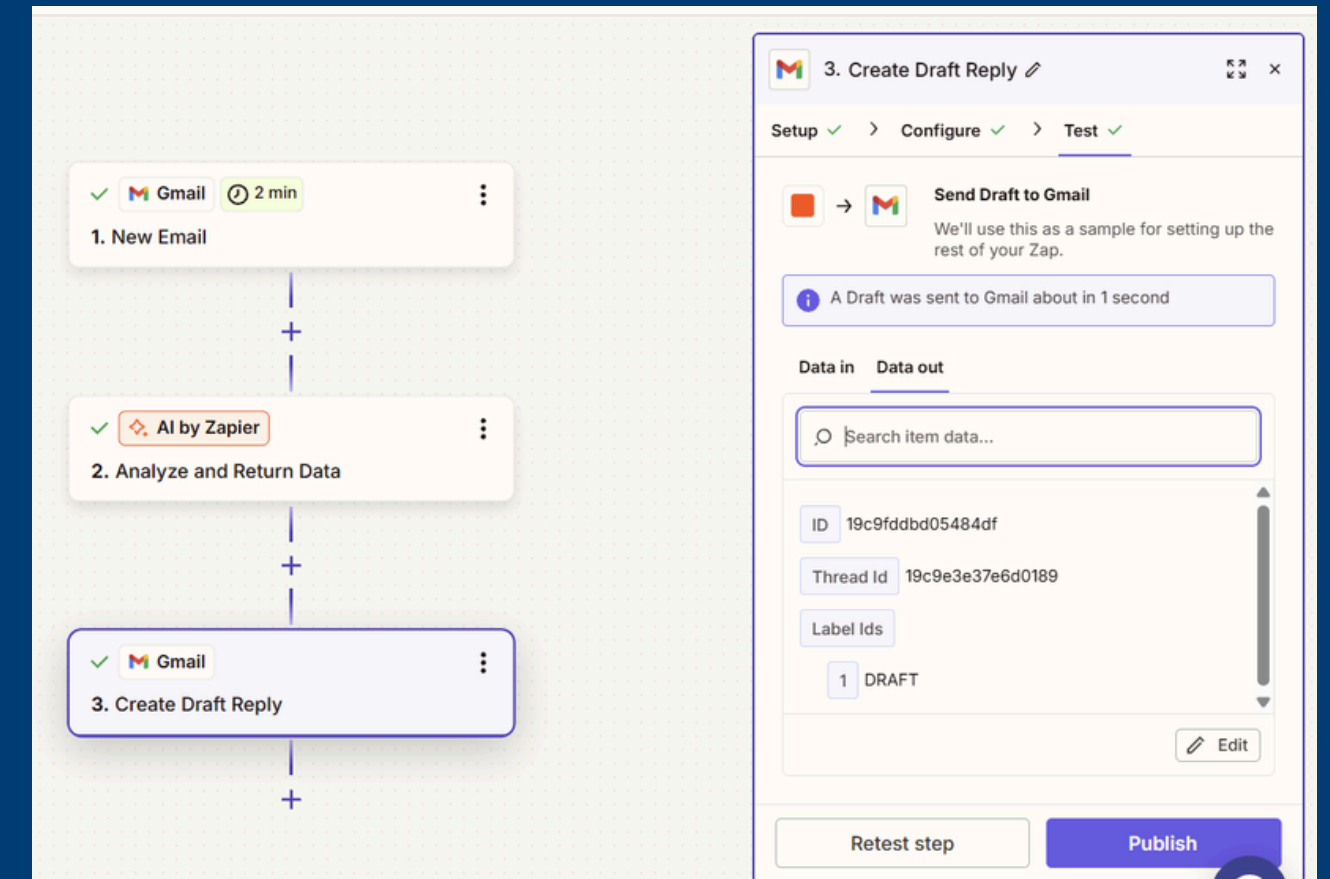

Developed as a demonstration project and ready for production deployment for businesses that require photo-based consultations, such as beauty services, and other industries where visual diagnostics is needed.

AI Customer Support Bot (FitGYM)

chatbot built with Zapier to answer client questions

A screenshot of the Fitbot chatbot interface. At the top, the bot says: "Hi! I'm your FitLife Studio assistant 😊 How can I help you today?". Below this, the bot provides instructions for booking a free trial class and lists the required details: Name, Email, Phone, Training type, and Day and Time. A "Booking form" is displayed with input fields for each of these details and "No thanks" and "Submit" buttons. To the right of the form are two green buttons: "Where are you located?" and "Membership options", with a link "Show more suggestions" below them. At the bottom, there are three more buttons: "Where are you located?", "What types of classes do you offer?", and "Connect with manager", followed by a search bar containing the text "Ask me anything".
